W E L C O M Welcome to our office! It is well known that families who maintain strong healthy, well-aligned spines have much improved health. People whose spines are not kept in proper alignment are much more likely to develop health disorders later in life such as arthritis, illness, pain, heart attacks, strokes, even cancer.

Our purpose is to care for and educate as many families as possible towards optimal health. Spinal subluxation destroys an optimal spine and your ability to have optimal health. Your experience with this office will not only be one of healing, but also of learning about optimal health and healing.

Health Symptom/Complaint Questionnaire

Three Types of Care

1.Relief/Crisis Care Temporary Relief

Many people begin here. Their ache, pain, or other obvious symptom is often what prompts them to begin chiropractic care. Careful! If you stop care as soon as you feel better, before muscles and soft tissues heal, you can invite needless relapse.

2.Corrective Care Keep Your Health

Regular chiropractic care can help maintain your progress and avoid a relapse. Your visit schedule will vary based on your age, condition and the stresses in your life. The intention is to help you preserve your progress so far.

3.Wellness Care Being Your Best

Simply put, we experience our lives through our nervous system. That's why optimizing our spines and nervous systems is the key to health and becoming all that we can be. Chiropractic care and other healthy habits create new possibilities.

Your Health Affects Everything You Do and Everyone You Know

With so many people depending on you it makes sense to invest wisely in your health!

Our purpose is to care for and educate as many families as possible towards optimal health! Subluxations cause spinal decay that destroys an optimal spine and your ability to have optimal health. Your experience with this office will not only be one of healing, but also of learning about optimal health and maximizing your healing.

This office practices evidence based spinal care. This practice is based on nationally recognized practice guidelines as well as published research conducted at numerous universities and chiropractic colleges. Our commitment to you is to deliver the safest, highest quality of life changing care we can deliver focused on the reduction of spinal cord tension, spinal subluxations and to develop and maintain spinal and neural integrity.

To begin care, we need your consent to perform a history and physical evaluation focused on testing procedures and questions that solely relate to quality of life, stress levels, body awareness, spinal cord tension, spinal subluxations and the loss of spinal and neural integrity. We will not be performing a differential diagnosis to detect the presence of or determine target treatment for any disease, condition or symptom. The only diagnosis we will provide is that of spinal subluxation. If you desire advice, diagnosis or treatment for any symptom, condition, disease or concern we recommend that you seek the services of a health care provider who specializes in that area.
